Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

In view of the Brief filed on 17 February 2004, PROSECUTION IS HEREBY REOPENED. A new ground of rejection is set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) request reinstatement of the appeal.

If reinstatement of the appeal is requested, such request must be accompanied by a supplemental appeal brief, but no new amendments, affidavits (37 CFR 1.130, 1.131 or 1.132) or other evidence are permitted. See 37 CFR 1.193(b)(2).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000.

Art Unit: 1647

Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-3, and 6-7 are rejected under 35 U.S.C. 102(e) as being anticipated by Campfield et al. (U.S. Pat. No. 6,025,325).

The instant claims encompass administration of an OB receptor agonist (or OB protein) to an animal (claim 1). Claim 2 requires the agonist to be human OB protein and claim 3 requires the amount to be in the range of 1 microgram per kilogram to about 50 micrograms per kilogram body weight. The limitations of "conferring resistance to endotoxic shock", the shock "occurs in sepsis" and "occurs in systemic inflammatory reponse syndrome" are intended use recitations and these limitations would still be met by the administration of leptin for another purpose. The art will be applied accordingly.

Campfield et al. teach compositions of OB protein from mice and humans (see at least column 12-13). Campfield et al. further teach the administration of human OB to animals in the range of 1 microgram per kilogram to about 50 micrograms per kilogram body weight (see at least example 16 at column 27). Since the method steps meet the limitations of the claims, the invention of Campfield et al. would be expected to also meet the limitations of conferring resistance to endotoxic shock as recited in the claims, regardless of the nature of the shock, absent evidence to the contrary.

Rejections which are maintained

Claims 18, 20-24 and 27 stand rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way to

Art Unit: 1647

enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention for the reasons of record in the previous Office actions.

Claims 18, 20-24, 26, 28-31 stand rejected under 35. U.S.C. 103(a) as being unpatentable over Grunfeld et al. (J. Clin. Invest. 97(9) : 2152-2157, 1996) for the reasons of record in the previous Office actions.

The previous rejection of claims 1-3 and 6-7 for lack of enablement is withdrawn in light of the new ground of rejection above.

Conclusion

No claim is allowed.
